

Spring Creek Landscape Co.

Landscape Design

Our aim here at Spring Creek Landscape Co. is to provide our customers with a comprehensive landscape design that is both creative and realistic in scope, and is tailored to the individual needs of our clients. To help accomplish this we have developed a landscape design process that helps take the project through an orderly set of criteria to ensure a successful design and to fulfill the needs of our clients. The cost of a landscape design varies depending on the size and complexity of the project. Many times the design fee is waived when a construction contract is signed authorizing Spring Creek Landscape Co. to do all or part of the work. For the do-it yourself type individuals, or for anyone wanting just the design there is a design fee that is paid at the completion of the design process.
